I see myself as a lifelong learner in the ever-evolving world of technology. My vision is to continuously absorb new knowledge, master relevant technologies, and apply my skills in a challenging environment where I can grow exponentially while helping the team achieve its goals.

Project Experience

Website RaisinSoft

Oct 20 – Dec 2024

- The RaisinSoft website is a game store platform that features game-themed articles and provides game information services to users.
 - Built using Laravel, Tailwind CSS, and DaisyUI.
 - Provides login functionality and an admin dashboard for content management.
 - Includes a user profile feature.
 - Fetches game data from the RAWG API.

BoooooomBlog "Aplikasi Blogging"

May 2025 – Jun 2025

- BoooooomBlog is a mobile-based blogging application connected to a Laravel backend, allowing users to read, create, edit, and delete articles. I acted as the Full-Stack Developer on this project.
My responsibilities included:
 - Building a RESTful API using Laravel for article and user management.
 - Developing an Android application using Jetpack Compose that consumes the API.
 - Implementing user authentication features (login and registration) and CRUD (Create, Read, Update, Delete) operations for articles.

Organization

Google Developer on Campus [Universitas Pasundan]

Curriculum & Learning Division Member - UI/UX

Oct 2024 – Present

- Responsible for designing and developing UI/UX learning materials for club members, covering fundamental topics such as user research, wireframing, and prototyping.
- Proactively facilitate knowledge-sharing sessions and study groups to enhance the technical skills of fellow members in user interface and user experience design.
- Collaborate with other curriculum team members to develop a learning syllabus that is relevant to the latest industry trends.

Education

Universitas Pasundan

Informatic Engineering • October 2022 – Present

IPK (3.37 / 4.00)
